

MARKET PROFILE

Today's North American tire industry is constantly in flux. At any given time, several market forces are working in tandem to shape and re-shape the present and future of the tire industry. It's this constantly changing landscape that makes it so difficult to pin down an accurate picture of the overall tire industry.

To help steady the shifting target, we've compiled this Market Profile section – a collection of real-world data that, taken as a whole, can help you see emerging markets while they are still trends so you can better prepare your business for what lies ahead.

Through painstaking research, we've been able to assemble this collection of data, which includes: tire

shipments for passenger, light truck/SUV, medium truck, OTR, ag/forestry; a look at the OE and replacement segments of the high performance market; the most popular tire sizes at OE and replacement; and brand and channel segmentation, new vehicle sales and vehicle registrations.

As an additional bonus, TIRE REVIEW presents tire brand market share data – applied strictly to the independent tire dealer channel – covering the passenger, light truck/SUV, high performance, medium truck, OTR and ag/forestry tire segments.

It's a truly comprehensive look at a dynamic industry.
